

CraftBot 3

From desktop FDM (Fused Deposition Modeling) printers, CraftBot 3 stands out from the competition with its print quality and two independent print heads.

Thanks to its two heads, our printers virtually double their printing capacity up to a given overall size (187x250x250mm). This allows us to produce with short deadlines even with short deadlines even with larger numbers.

In addition, the two head design allows you to print with support material or even one model in two different colors.

Main technical parameters

Technology	Fused Deposition Modeling
Workspace	270 x 250 x 250 mm
Layer thickness	0,05 mm
Material	PLA
Color of product	optional
