

## 3D Systems ProJet MJP 2500 Plus

The 3D Systems uses Multi Jet Printing technology to build the model using UV-curing plastic and wax.

Primarily recommended for prototypes, ornaments, and parts that are particularly important for dimensional accuracy and excellent surface quality.

### Main technical parameters

Technology	Material Jetting
Workspace	294 x 211 x 144 mm
Layer thickness	0,032 mm
Printer resolution	800 x 900 x 790 DPI
Material	VisiJet M2R-BK
Color of product	black

MJ  
Material Jetting
